

Midterm Project: E-Portfolio (Object-Oriented Programming)

Project Overview

Students are required to create an **E-Portfolio using Wix** that showcases their **Midterm and Final outputs** in Object-Oriented Programming (OOP). The portfolio should demonstrate understanding of OOP concepts, programming skills, and reflections on learning.

Note: You may use Wix or any other platform such as Google Sites, WordPress, GitHub Pages, or similar tools to create your e-portfolio.

Objectives

By completing this project, students should be able to:

- Apply Object-Oriented Programming concepts in Java
- Present programming outputs in an organized digital format
- Reflect on learning and problem-solving processes
- Create a professional online portfolio using Wix

✂ Instructions: Steps to Create Your Wix E-Portfolio

1. Sign Up or Log In

- Go to **Wix.com**
- Create an account or log in

2. Choose a Template

- Click **Create New Site**
- Select **Portfolio & CV**
- Choose a clean template
- Click **Edit**

3. Create the Required Pages

Home Page

Include:

- Full Name
- Course: *Object-Oriented Programming*
- School/Section

Introduction:

This e-portfolio presents my Midterm Project in Object-Oriented Programming using Wix. It includes quizzes, activities, and exams that demonstrate my understanding of OOP concepts.

Midterm Page

Include:

- **Midterm Quizzes**
 - Questions, answers, explanations
- **Midterm Seatwork**
 - Questions, answers, explanations
- **Midterm Activities**
 - Java programs (ATM, decision structures, methods)
 - Code screenshots
 - Explanation + learnings
- **Midterm Exam**
 - Answers/code
 - Reflection

4. Add Multimedia

- Screenshots of code/output
- Upload PDFs/documents
- Use images/diagrams
-

5. Navigation Menu

Must include:

- Home
- Midterm
- Final
- Contact

6. Publish

- Preview your website
- Click **Publish**
- Submit your Wix link

Grading Rubric (100 Points)

Criteria	Description	Points
Content Completeness	Includes all required sections (Midterm, Final, Contact)	20 pts
OOP Application	Demonstrates understanding of OOP concepts (classes, methods, etc.)	20 pts
Code Presentation	Clear code, screenshots, and outputs are shown	15 pts
Explanation & Reflection	Clear explanations and meaningful reflections	15 pts
Design & Layout	Clean, organized, and visually appealing Wix design	10 pts
Navigation & Functionality	Links work properly, easy to navigate	10 pts
Creativity & Effort	Shows effort, originality, and completeness	10 pts

TOTAL: 100 POINTS

Additional Guidelines

- Use a **consistent layout** across all pages
- Add **short but clear explanations**
- Focus on **understanding, not just output**
- Keep design **simple and professional**
